According to our (Global Info Research) latest study, the global Air Cooled Chillers Rental market size was valued at US\$ 193 million in 2024 and is forecast to a readjusted size of USD 260 million by 2031 with a CAGR of 4.4% during review period.

As of the current market development status, the demand for air-cooled chillers rental services is steadily increasing. The use of air-cooled chillers is becoming more popular in various industries such as manufacturing, construction, healthcare, and events. One of the key factors driving the market growth is the flexibility and cost-effectiveness of renting air-cooled chillers instead of purchasing them outright. Renting allows businesses to access high-quality chillers without the need for a large upfront investment, making it a more attractive option for many organizations. Additionally, the growing focus on energy efficiency and environmental sustainability is also contributing to the market development. Air-cooled chillers are known for their energy-efficient operation and lower carbon footprint compared to other cooling systems. With increasing regulations and awareness regarding environmental impact, businesses are opting for more eco-friendly solutions, further driving the demand for air-cooled chillers rental. Furthermore, the rise in temporary or seasonal projects, such as construction projects or special events, is fueling the demand for air-cooled chillers on a rental basis. These projects often require temporary cooling solutions for a specific duration, making renting a more practical choice.
