The global Air-cooled DC-DC Module market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The characteristics of the air-cooled DC/DC module: high heat dissipation efficiency, wide adaptability to the environment, compact design, flexibility, and stable performance. In the design and application process, the impact of heat dissipation, noise and vibration on the environment and equipment must be considered comprehensively.

The air-cooled DC/DC module is a DC-DC converter module that is cooled by fan cooling by converting the input DC power (usually high voltage) to the required output voltage (usually lower voltage). The air-cooled DC/DC module uses fans to dissipate heat to keep the temperature of the module within a safe range.
