Abstracts

The global Air Domes market size is expected to reach \$ 915 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

In 2025, global production of Air Domes reached 1,850 sets, with an average selling price of USD 320,000 per set, total production capacity of 2,500 sets, and a gross margin of 35%.

Air Domes are air-supported structures constructed primarily from flexible membrane materials, where internal air pressure generated by continuous airflow maintains structural stability. Without the need for conventional beams or columns, they enable rapid construction of large-span, column-free spaces and are widely used in sports facilities, temporary exhibition halls, industrial storage, and emergency infrastructure. The global Air Domes market remains relatively niche but highly specialized, with demand primarily driven by sports and recreational facilities, temporary industrial spaces, and regions with cold or extreme climates. North America and Europe represent mature markets with established technical and safety standards, while Asia-Pacific is experiencing faster growth supported by expanding sports infrastructure and demand for flexible buildings. Projects are typically customized with high unit values, and the market is dominated by a limited number of companies possessing integrated engineering design and membrane-structure expertise.

This report studies the global Air Domes production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Air Domes and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
