Abstracts

Air Separation Plant is the equipment used in the separation of the air, which is used to produce the oxygen, nitrogen, etc.

Scope of the Report:

This report focuses on the Air Separation Plant in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
The future market of air separation plant depends on the development of technology, demand and suppliers of air separation unit. Worldwide Installations are not performing in a high lightened way because of sluggish economy. Europe is the largest production market. China is still the fastest growing country, but the speed is expected to slow down because of economic outlook, and the government's capacity reduction policy has brought negative effect on the demand of Air Separation Plant installation.

As international economic situation is complicated, in the next few years there will be many uncertainties. Because of the support of government' policy, more companies are entering air separation plant industry.

Although sales of Air Separation Plant show a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage and downstream support, do not to enter into this industry.

The worldwide market for Air Separation Plant is expected to grow at a CAGR of roughly 4.4% over the next five years, will reach 4500 million US$ in 2023, from 3480
