According to our (Global Info Research) latest study, the global Air Texturing Machine market size was valued at US$ 595 million in 2025 and is forecast to a readjusted size of US$ 917 million by 2032 with a CAGR of 6.4% during review period.

The air textured yarn machine is a machine and equipment used for synthetic fiber processing. It is mainly used for twisting, deforming and finishing synthetic fibers to improve the softness, gloss and feel of the fibers. This machine uses the air force generated by high-pressure air flow through the nozzle to stretch and organize the fiber bundles, thereby twisting and deforming the fibers. Air textured yarn machines play an important role in the production of synthetic fibers, and are especially widely used in the production of polyester, nylon and other synthetic fibers.
