The global Air-to-Ground Base Station market size is expected to reach \$ 203 million by 2030, rising at a market growth of 7.0% CAGR during the forecast period (2024-2030).

Air-to-Ground is a Two-way communication between aircraft and stations or locations on the surface of the earth. The ground network consists of A2G base stations with skywards-pointing antennas optimized for airspace coverage, which create very large cells in the sky. Given that, unlike on the ground, radio signals can freely propagate.

This report studies the global Air-to-Ground Base Station production, demand, key manufacturers, and key regions.
