## Abstracts

The air transportation industry uses aircraft, such as airplanes and helicopters to provide air transportation services of passengers and/or cargo. It includes services offered by both scheduled and nonscheduled air carriers, however, scenic and sightseeing air transportation and air courier services are not included under the air transportation industry.

### Scope of the Report:

Global airlines are focusing on alternate streams of revenue to increase revenues and profit margins. This is mainly due to increasing competition in the air transportation industry as airlines are cutting ticket prices owing to decline in aircraft turbine fuel costs, thus having a negative impact on profit margins. In this regard, an important alternate revenue generating stream for air carriers is the sales of ancillary products and services across their value chain. Ancillary products and services include pre-checking of baggage, booking preferred seats, excess baggage and Wi-Fi connectivity.
