## Abstracts

The global Airbag market size is expected to reach \$ 15080 million by 2032, rising at a market growth of 1.8% CAGR during the forecast period (2026-2032).

An airbag is a vehicle occupant-restraint system using a bag designed to inflate extremely quickly, then quickly deflate during a collision. It consists of the airbag cushion, a flexible fabric bag, an inflation module, and an impact sensor. The purpose of the airbag is to provide a vehicle occupant a soft cushioning and restraint during a crash event. It can reduce injuries between the falling occupant and the interior of the vehicle.

The airbag provides an energy-absorbing surface between the vehicle's occupants and a steering wheel, instrument panel, body pillar, headliner, and windshield. Modern vehicles may contain multiple airbag modules in various configurations, including, driver, passenger, side-curtain, seat-mounted side-impact, knee bolster, inflatable seat belt, front right- and left-side sensor, and pedestrian airbag modules.

The top four manufacturers of airbags in the world are Autoliv, Joyson Safety Systems, ZF-TRW and Toyota Gosei.

This report studies the global Airbag production, demand, key manufacturers, and key regions.
