According to our (Global Info Research) latest study, the global Airbag market size was valued at USD 12700 million in 2023 and is forecast to a readjusted size of USD 14310 million by 2030 with a CAGR of 1.7% during review period.

An airbag is a vehicle occupant-restraint system using a bag designed to inflate extremely quickly, then quickly deflate during a collision. It consists of the airbag cushion, a flexible fabric bag, an inflation module, and an impact sensor. The purpose of the airbag is to provide a vehicle occupant a soft cushioning and restraint during a crash event. It can reduce injuries between the flailing occupant and the interior of the vehicle.

The airbag provides an energy-absorbing surface between the vehicle's occupants and a steering wheel, instrument panel, body pillar, headliner, and windshield. Modern vehicles may contain multiple airbag modules in various configurations, including, driver, passenger, side-curtain, seat-mounted side-impact, knee bolster, inflatable seat belt, front right- and left-side sensor, and pedestrian airbag modules.

The top four manufacturers of airbags in the world are Autoliv, Joyson Safety Systems, ZF-TRW and Toyota Gosei.
