## Abstracts

According to our (Global Info Research) latest study, the global Airbed Mattress market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

An airbed mattress, also known as an airbed, is an inflatable mattress, the majority of which are usually made of polyvinyl chloride (PVC), although recently developed textile-reinforced urethane plastic or rubber versions exist. The deflated mattress can be rolled up or folded and carried or stored relatively easily, making them a popular choice for camping trips and for temporary bedding at home for guests. They are inflated either orally by blowing into a valve, or with a manual foot-powered or more commonly inflated via an electric pump. Some are even automatically inflating (up to a certain pressure—some additional inflation is also needed) just by opening the valve.

The Global Info Research report includes an overview of the development of the Airbed Mattress industry chain, the market status of In-home (PVC, Rubber), Out-home (PVC, Rubber), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Airbed Mattress.
