Abstracts

An increasing trend to adopt the more electric aircraft (MEA) concept has resulted in an increasing number of electronic components replacing the traditional mechanical or hydraulic components. This has resulted in an increased power requirement for electronic components, further increasing the demand for power generation systems and would be the major driver for the growth of the aircraft actuator market.

SCOPE OF THE REPORT:

Among all the electronic components types, converters accounted for the largest market share in 2017 and the market for the same is estimated to grow at the highest CAGR between 2018 and 2025. Due to the emergence of the more electrical aircraft concept, the requirement of electricity generation and distribution in aircraft would increase significantly; this would give rise to the associated components market including converters.

The worldwide market for Aircraft Actuator is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
