Abstracts

The global Aircraft Amenity kits market size is expected to reach \$ 745 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Aircraft amenity kits are sets of personal care and travel-related items provided by airlines during the in-flight service to enhance the passenger experience. Typically offered in pouches, boxes, or reusable packaging, these kits contain travel essentials such as a toothbrush and toothpaste, eye mask, earplugs, socks, skincare products, lip balm, and a comb; they are primarily provided in First Class, Business Class, and select Economy Class cabins. Beyond serving as functional cabin supplies, these kits act as a key vehicle for airlines to elevate service quality, strengthen brand image, and achieve competitive differentiation. Premium amenity kits often feature bespoke designs created through collaborations with international skincare, luxury, or lifestyle brands?combining branded products, distinctive packaging, and travel accessories to enrich the passenger experience and boost product value. In 2025, global sales volume for travel amenity kits reached 84 million units, with a production capacity of approximately 110 million units, an average selling price of \$6.90 per unit, and an average gross margin of 25%?35%.

Europe is the largest market, followed by North America. The aircraft amenity kit industry is expected to maintain steady growth, driven primarily by the recovery of global air passenger traffic, upgrades to premium cabins, and rising demand for eco-friendly solutions. Competition will increasingly focus on premiumization, customization, and sustainability; companies possessing airline client networks, brand integration capabilities, and global delivery networks will secure greater market opportunities. Meanwhile, trends such as the shift toward digital services, lightweight designs, and airline cost-cutting measures may exert substitution pressure on traditional aircraft amenity kits?for instance, some airlines might reduce the provision of low-value kits in

economy class or adopt an 'on-demand' distribution model. Consequently, future industry growth will center on the high-value business and first-class segments, as well as on innovative aircraft amenity kits that offer environmental benefits and command a brand premium.
