According to our (Global Info Research) latest study, the global Aircraft Demolition and Recycling market size was valued at US\$ 978 million in 2025 and is forecast to a readjusted size of US\$ 1766 million by 2032 with a CAGR of 8.9% during review period.

Aircraft demolition and recycling is the process of decommissioning and dismantling retired or obsolete aircraft to recover valuable materials and components. This involves the systematic disassembly of the aircraft, where parts such as engines, avionics, landing gear, and other reusable components are salvaged for resale or repurposing. The remaining materials, such as aluminum, steel, and composites, are sorted and processed for recycling. The goal is to minimize environmental impact by diverting waste from landfills and maximizing the recovery of valuable resources, while adhering to safety, regulatory, and environmental standards. Aircraft demolition and recycling is an essential part of the aviation industry's lifecycle management and sustainability efforts.
