## Abstracts

According to our (Global Info Research) latest study, the global Aircraft Engine Controller market size was valued at USD 117.3 million in 2022 and is forecast to a readjusted size of USD 152.6 million by 2029 with a CAGR of 3.8% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

In modern aircraft, Full Authority Digital Engine Control (FADEC) makes flying easier, safer, more efficient and more predictable. By continuously monitoring and automatically adjusting the aircraft's engine performance and related standards during each flight, FADEC enables pilots to focus their energy and attention on the environment in which they are flying and the safety of their passengers or cargo.

FADEC utilizes the limit capability of the digital electronic control system to complete all the tasks stipulated by the system, and is an inevitable control form for high-performance aircraft and integrated aircraft control
