Abstracts

Aircraft health monitoring systems (AHMS) collect data in real time from the aircraft fleet and make it available to ground operations. Various sensors are installed at various damage hotspots throughout aircraft structure/engine, which provide an early detection of anomaly (or initiation of crack/fatigue). Thus, necessary preventive measures can be implemented on-time, which reduces the chances of critical damage and major system failure.

Scope of the Report:

This report focuses on the Aircraft Health Monitoring Systems (AHMS) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
