## Abstracts

The global Aircraft Launching System market size is expected to reach \$ 920 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

In 2025, global Flight Deck Catapult production reached approximately 7,917 units , with an average global market price of around US\$ 71,367 per unit. Gross margin is about 49%. The cost is 36,397 usd. The Production Capacity is about 9,000 units. An Aircraft Launching System (ALS) is a naval system on aircraft carriers that rapidly accelerates aircraft to takeoff speed, enabling safe launch from limited deck space. ALS can use steam catapults or electromagnetic (EMALS) technology, supporting heavier and advanced carrier-based aircraft. Its upstream involves high-strength materials, precision components, control systems, and energy storage technologies, while downstream serves aircraft carriers, naval aviation units, defense contractors, and maintenance/training services. ALS is a critical component of carrier strike capability and naval aviation operations.
