## Abstracts

According to our (Global Info Research) latest study, the global Aircraft Line Maintenance market size was valued at USD 17310 million in 2023 and is forecast to a readjusted size of USD 21510 million by 2030 with a CAGR of 3.2% during review period.

Line maintenance is a part of aircraft MRO, which refers to the works on discrepancies as per the requirements of the flight crew in order to ensure airworthy condition of the aircraft. These works are conducted before or in between flight operations on a regular basis. Line maintenance involves two components: labor and materials. Some of the line maintenance activities are A checks, weekly/overnight checks, daily checks, transit checks, and pre-flight checks.

The aircraft line maintenance market in the Asia Pacific region is projected to grow at the highest CAGR from 2018 to 2023. The growth of the Asia Pacific aircraft line maintenance market can be attributed to the increase in the aircraft production in the region and rise in the number of new aircraft delivered. Moreover, increased demand for MRO services from the region is expected to drive the growth of the Asia Pacific line maintenance market from 2018 to 2023.
