## Abstracts

According to our (Global Info Research) latest study, the global Aircraft Seals market size was valued at USD 1045.4 million in 2023 and is forecast to a readjusted size of USD 1178.2 million by 2030 with a CAGR of 1.7% during review period.

Seals are materials or parts that prevent fluid or solid particles from leaking between adjacent joint surfaces and prevent foreign impurities such as dust and moisture from intruding into parts of machinery and equipment.

Aircraft seals refer to seals used in aircraft manufacturing. Aircraft seals have extremely strict product requirements and are subject to special spacecraft standards. This report studies the aircraft seal market, including various seal products used in the production and manufacturing of commercial small aircraft, medium passenger aircraft, large passenger aircraft, and military aircraft.

Seals can be divided into two categories: static sealing between relatively static joint surfaces and dynamic sealing between relatively moving joint surfaces. Seals are one of the most widely used parts in mechanical products. Aircraft seals include general-purpose seal products and aircraft-specific customized seal products.

Global key manufacturers of aircraft seals include Trelleborg, Parker Hannifin, etc. Top two players have a share over 20 percent. North America and Europe are two key producers of aircraft seals, and they hold a share about 65%. In terms of product type, the dynamic seals segment is dominating this industry, with a share over 70%. And in terms of application, the engine is the largest application, with a share about 53%,

The Global Info Research report includes an overview of the development of the Aircraft
