Aircraft System is a complex system comprised of several simple sub systems to ensure continued airworthiness of the aircraft.

SCOPE OF THE REPORT:

Due to fluctuation of global economics in recent years, aircraft systems market developed in a slow speed. At present, Europe and USA are still the main market of aircraft systems. With the developing of commercial aircraft and military aircraft industry, developing countries will become important in the market, such as China and Brazil etc. Viewed from the supply side, there are a few manufacturers in the aircraft systems industry, while from the demand side; the current demand for aircraft systems is growing.

At present, there are a few manufacturers in the world and the market concentration is high. The top5 revenue companies are GE, Raytheon, Honeywell, Northrop Grumman and Rolls-Royce. The five companies occupy about 55% of the market share.

To grab more market, the little companies have to expand the technology, capital investment and brand influence. To meet the challenge of the little companies and keep their leading stage, leading companies need to increase the technology innovation and speed up the product upgrading. Due to the stable supplying chain, aircraft systems market will still be a market leading by a few companies in future.

The worldwide market for Aircraft Systems is expected to grow at a CAGR of roughly 1.8% over the next five years, will reach 116700 million US\$ in 2024, from 104700 million US\$ in 2019, according to a new GIR (Global Info Research) study.
