Abstracts

The global Aircraft Tires market size is expected to reach \$ 1120 million by 2032, rising at a market growth of 0.6% CAGR during the forecast period (2026-2032).

In 2025, global aircraft tires production reached approximately 1.24 Million Unit, average price was about 818 US\$ per Unit.

Aircraft tires are specialized tires designed for use on aircraft landing gear systems. They are engineered to withstand extremely high loads, heavy impact forces during landing, rapid acceleration during takeoff, and wide temperature variations. Unlike standard vehicle tires, aircraft tires operate at much higher inflation pressures and are constructed with multiple layers of reinforced materials such as nylon or aramid cords to ensure strength, durability, and resistance to wear. They are critical components for safe aircraft operations, providing traction during landing and taxiing while supporting the aircraft's weight on the ground. Aircraft tires are commonly classified into types such as bias-ply and radial tires, depending on their internal construction.

In recent years, with the continued recovery of global air transportation demand and the expansion of aircraft fleets, aircraft tyres, as essential safety components in aviation operations, have maintained steady market demand growth. Aircraft tyres support aircraft during take-off, landing, taxiing and ground parking, providing load-bearing, shock absorption and braking functions. They must maintain stable performance under high speed, heavy load, strong impact and complex climate conditions. Therefore, aircraft tyres are not only an important part of the aviation consumables market, but also a core basic component for ensuring flight safety and operational efficiency.

From the demand structure perspective, commercial passenger aircraft represent the

largest application segment for aircraft tyres. With the recovery of global flight volumes, fleet renewal by airlines, and increased deliveries of narrow-body and wide-body aircraft, both OEM demand and replacement demand are growing simultaneously. Compared with other aviation components, aircraft tyres have clear consumable characteristics. Their service life is affected by landing cycles, route conditions, runway conditions and aircraft load. As a result, aftermarket replacement demand accounts for a significant share of the market. Meanwhile, cargo aircraft, business jets, military aircraft and general aviation aircraft also provide stable demand.

In terms of product structure, aircraft tyres are mainly divided into radial tyres and bias tyres. Radial tyres feature lighter weight, better wear resistance, improved heat dissipation and longer service life, and their application share continues to increase in commercial aircraft and high-end aircraft models. Bias tyres have mature structures and relatively lower costs, and they are still used in some military aircraft, general aviation aircraft and specific aircraft types. As airlines place greater emphasis on fuel efficiency, maintenance cost control and operational safety, high-performance, lightweight and long-life aircraft tyres are becoming the key direction of industry upgrading.

From the industry chain perspective, upstream suppliers include natural rubber, synthetic rubber, carbon black, steel cord, aramid fibre and specialty chemical additives. Midstream players are aircraft tyre manufacturers, while downstream customers include aircraft manufacturers, airlines, maintenance service providers and military aviation users. The industry has high technical barriers, as products must meet strict aviation airworthiness certifications and safety standards. Requirements for material formulation, structural design, manufacturing process and quality control are extremely high. Therefore, the global aircraft tyres market is relatively concentrated, with leading companies holding advantages in technology accumulation, certification systems and global service networks.

This report studies the global Aircraft Tires production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Aircraft Tires and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Aircraft Tires that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Aircraft Tires total production and demand, 2021-2032, (Units)
Global Aircraft Tires total production value, 2021-2032, (USD Million)
Global Aircraft Tires production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)
Global Aircraft Tires consumption by region & country, CAGR, 2021-2032 & (Units)
U.S. VS China: Aircraft Tires domestic production, consumption, key domestic manufacturers and share
Global Aircraft Tires production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)
Global Aircraft Tires production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)
Global Aircraft Tires production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global Aircraft Tires market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Michelin, Bridgestone, Goodyear, Dunlop, Haohua Chemical, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Aircraft Tires market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Aircraft Tires market?
2. What is the demand of the global Aircraft Tires market?
3. What is the year over year growth of the global Aircraft Tires market?
4. What is the production and production value of the global Aircraft Tires market?
5. Who are the key producers in the global Aircraft Tires market?
6. What are the growth factors driving the market demand?

 - 5.3.2 World Aircraft Tires Production Value by Type (2021-2032)
 - 5.3.3 World Aircraft Tires Average Price by Type (2021-2032)

6 MARKET ANALYSIS BY PROCESS

- 6.1 World Aircraft Tires Market Size Overview by Process: 2021 VS 2025 VS 2032
- 6.2 Segment Introduction by Process
 - 6.2.1 New Tire
 - 6.2.2 Retreaded Tire
- 6.3 Market Segment by Process
 - 6.3.1 World Aircraft Tires Production by Process (2021-2032)
 - 6.3.2 World Aircraft Tires Production Value by Process (2021-2032)
 - 6.3.3 World Aircraft Tires Average Price by Process (2021-2032)

7 MARKET ANALYSIS BY FUNCTION

- 7.1 World Aircraft Tires Market Size Overview by Function: 2021 VS 2025 VS 2032
- 7.2 Segment Introduction by Function
 - 7.2.1 Main Landing Gear Tire

- 7.2.2 Front Landing Gear Tire
- 7.3 Market Segment by Function
 - 7.3.1 World Aircraft Tires Production by Function (2021-2032)
 - 7.3.2 World Aircraft Tires Production Value by Function (2021-2032)
 - 7.3.3 World Aircraft Tires Average Price by Function (2021-2032)

8 MARKET ANALYSIS BY APPLICATION

- 8.1 World Aircraft Tires Market Size Overview by Application: 2021 VS 2025 VS 2032
- 8.2 Segment Introduction by Application
 - 8.2.1 Commercial Aircraft
 - 8.2.2 General Aircraft
 - 8.2.3 Military Aircraft
- 8.3 Market Segment by Application
 - 8.3.1 World Aircraft Tires Production by Application (2021-2032)
 - 8.3.2 World Aircraft Tires Production Value by Application (2021-2032)
 - 8.3.3 World Aircraft Tires Average Price by Application (2021-2032)
