Abstracts

According to our (Global Info Research) latest study, the global Aircraft Water Tanker market size was valued at US\$ 383 million in 2025 and is forecast to a readjusted size of US\$ 502 million by 2032 with a CAGR of 3.2% during review period.

In 2025, global production of aircraft water tankers reached 8,270 units, with an average selling price of \$45,000 per unit. The global annual production capacity of aircraft water tankers is approximately 15,000 units, and the gross profit margin is about 25.3%. Aircraft Water Tanker is a ground service vehicle specifically used at airports to supply clean water to aircraft. It mainly delivers clean water to the aircraft's washrooms, galleys, and toilet systems during ground parking, ensuring adequate and hygienic water supply on board. Such vehicles are typically equipped with water tanks, piping, and nozzles to quickly and safely refill aircraft with clean water. The upstream of aircraft water tankers includes chassis, water system components, filling systems, and so on. The midstream consists of aircraft water tanker manufacturers, while the downstream is mainly applications in domestic and international airports, among others.

As a key piece of ground support equipment at airports, the aircraft water tanker market is closely tied to the recovery of global air transport and the development of airport infrastructure. Currently, with the rebound in passenger traffic and the advancement of airport expansion projects, demand for aircraft water tankers continues to grow. Meanwhile, the promotion of green airport concepts is driving a shift towards electrification and cleaner technologies for aircraft water tankers. In terms of technology, these vehicles are evolving towards greater intelligence, higher efficiency, and integrated functionalities (such as combined fresh and waste water servicing) to improve apron operation efficiency. However, the market also faces challenges such as

product homogenization, after-sales service quality, and adaptability to different airport operating environments. Overall, the aircraft water tanker market is in a phase of steady growth accompanied by technological upgrading.
