## Abstracts

According to our (Global Info Research) latest study, the global Airgel Composites market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Airgel composite materials are simple and easy to understand that airgel + composite structural materials are transformed into airgel composite materials through technology. Airgel has the highest performance, but its low strength and toughness limit the wide application of materials. In order to improve the toughness and strength of airgel materials, various reinforcing materials (metals/oxides, fibers, non-woven fabrics and films, etc.) are combined with airgel materials to obtain airgel composites with unique properties.
