Abstracts

The global Airlaid Paper market size is expected to reach \$ 2253 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Airlaid paper is a textile-like material categorized as a nonwoven fabric made from fluff pulp. Compared with normal wet-laid paper and tissue, air-laid paper is very bulky, porous and soft. It has good water absorption properties and is much stronger compared with normal tissue.

Key players in the industry include Glatfelter, Duni AB and so on. Glatfelter is the largest supplier of airlaid paper globally with more than 30% share. The company is actively expanding their airlaid business through acquisition of airlaid business from Georgia-Pacific as well as building new plants.

As economies in Asia and Latin America continue to grow, demand for hygiene products is expected to increase significantly. Rising awareness about personal health, hygiene, and increasing purchasing power provide opportunities for airlaid paper producers to expand. In regions like China and India, the shift from traditional fabric or tissue-based products to modern disposable alternatives is driving demand for airlaid products in baby care, adult incontinence, and medical applications.

The airlaid paper market is set to experience robust growth due to increasing demand in various downstream industries.

This report studies the global Airlaid Paper production, demand, key manufacturers, and key regions.
