Airlaid paper is a textile-like material categorized as a nonwoven fabric made from fluff pulp. Airlaid paper can be used in adult incontinence, feminine hygiene, wipes and food pads, etc.

Among those applications, demand from feminine hygiene accounts for the largest share. In 2017, the field consumed 38.99% airlaid paper.

The global production of the airlaid paper increased from 434.2 K MT in 2013 to 459.8 K MT in 2017, backed with the increasing demand of downstream industry. Key players in the industry include Glatfelter, Georgia-Pacific and so on. North America, Europe and Asia-Pacific are the major consumers. The total three regions accounted for more than 93% consumption market share in 2017.

According to its bonding method, airlaid paper can be mainly divided into three types, latex-bonding, thermal-bonding, and multi-bonding. Each type has its own

characteristics and is widely used in various fields.

With rapid development of downstream industry, such as diapers, consumer wipes, adult incontinence etc., insiders think the airlaid paper market will experience good growth in the coming years. Glatfelter and Duni have planned to release more capacities in the last year.
