An airless paint spray hose is a flexible tube that is used to connect an airless paint sprayer to a spray gun. It is designed to withstand high pressure and deliver paint or other coatings from the sprayer to the gun without the need for compressed air. Airless paint spray hoses are typically made of durable materials such as nylon or polyurethane and come in various lengths and diameters to accommodate different spraying needs. They are commonly used in professional painting applications for large surfaces such as walls, ceilings, and exteriors.
