Instrument Landing System, ILS, is the most widely used precision approach and landing guidance system for aircraft. It is a ground-based instrument approach system that can operate in low-cloud, low-visibility instrument weather conditions and uses radio signals and high-intensity light arrays to provide precise guidance for a safe approach and landing.

According to our (Global Info Research) latest study, the global Airport ILS System market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
