The global Airport Luggage Trolley market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

An airport luggage trolley is a wheeled cart designed to assist travelers in transporting their luggage and belongings within an airport environment. Typically available near entrances, baggage claim areas, or other strategic locations within airports, these trolleys provide a convenient solution for passengers to easily move their luggage through terminals. Airport luggage trolleys are equipped with a set of wheels, a sturdy frame, and a handlebar, allowing users to stack and secure their bags on the cart. Some trolleys may have additional features such as brakes or electronic systems for automated handling. Passengers often use these trolleys to navigate through check-in areas, security checkpoints, and terminals, enhancing the efficiency and ease of the travel experience. In many cases, airports provide luggage trolleys either free of charge or for a nominal fee, contributing to the overall convenience and functionality of passenger services.
