Airtight grommets are components designed to create a seal around an opening or conduit to prevent the ingress or egress of air, moisture, dust, or other contaminants. Typically made from materials like rubber, silicone, or plastic, these grommets are used in various applications to protect and insulate cables, wires, and other components that pass through walls, panels, or other barriers.

Many regions have implemented stringent building codes and energy efficiency regulations designed to reduce energy consumption. Airtight sealing grommets play a crucial role in minimizing air leaks in HVAC systems, electrical installations, and plumbing systems, contributing to overall energy savings.
