Abstracts

Chronic obstructive pulmonary disease (COPD) is not curable, but can be managed with appropriate medication. Various awareness programs have been initiated by healthcare providers and health organisations/societies such as environmental programs, medication maintenance programs and online education programs for public and healthcare professionals, which encourage people to adopt early medication. This factor is expected to play a key role in increased revenue of the global respiratory devices market over the forecast period. Healthcare providers and organisations are teaming up to improve and prevent respiratory diseases across the globe. AstraZeneca and 10 industry leaders are teaming up to prevent and control prevalence of respiratory disease in China.

Scope of the Report:

This report focuses on the Airway Clearance Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Improvement in healthcare policies in various countries, such as the U.S., has enhanced the affordability for various diagnostic and treatment services, and in turn amplified the life expectancy of the people. The burgeoning ageing population will raise the number of people diagnosed with COPD and asthma. Overall management of asthma and COPD is very crucial and problematic after 65 years of age. People above 65 years who are diagnosed with asthma and COPD are unable to consume liquid medication. Airway clearances are thus turning out to be the ultimate choice as they convert liquid medication into aerosol or mist. Moreover, the rise in per capita income is influencing individuals to spend more on health care, as concerns regarding healthcare

is increasing with increasing living standards. The other factors that are benefiting the North America airway clearance systems market are the expansion of third-party payer coverage by manufacturers, growth of home care and institutional market, high incidence rate of chronic diseases, employment of the Affordable Care Act, and the lowering cost of the treatment settings. However, it is yet to be seen that whether the strict regulation scenario act as a hurdle or not.

The worldwide market for Airway Clearance Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
