Abstracts

AISG connectors are screw coupling connectors that are designed according to the specifications created by AISG (Antenna Interface Standards Group). AISG connectors are mostly seen with 8 contacts and employed in BTS, TMA, RET devices and control cables. Based on the open specifications by AISG, those connectors are widely implemented in industrial controls, data processing, medical devices, telecommunication network and marine applications.

Scope of the Report:

This report studies the AISG Connector market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the AISG Connector market by product type and applications/end industries.

We believe the major reason for the lack of growth is related to economic problems in Europe and the fact that the growth in global Gross Domestic Product (GDP) is lower than historical norms. Most believe we will remain in a slow growth environment in the electronic industry until the US GDP starts to improve. Besides, as a very important spot of AISG connector technology, Japan is close to slopping into recession.

In terms of the innovation system of AISG connector industry, China is continuously gaining potential of being the industry leader in both manufacturing and technology, along with the growing leadership of some global-level Chinese telecommunication suppliers such as Huawei and ZTE.

The global AISG Connector market is valued at 1000 million USD in 2017 and is expected to reach 1080 million USD by the end of 2023, growing at a CAGR of 1.4% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in

China, also fast growing India and Southeast Asia regions. North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of AISG Connector.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
