According to our (Global Info Research) latest study, the global Al-Ti Master Alloy market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The grain refinement of aluminum by addition of Al-Ti and Al-Ti-B master alloys has been widely used and studied in recent years. Much practical and theoretical work has been done to investigate a more effective Al-Ti-B master alloy, while Al-Ti has often been considered as more simple and understandable master alloy. In certain areas, Al-Ti master alloys have been used extensively as an alternative to Al-Ti-B grain refiner. TiAl₃ particle in Al-Ti grain refiner is a more powerful nucleant for α -Al than any other heterogeneous nucleating particle
