An alignment tester is a device that measures the position, angle, and direction of the wheels, called the alignment of an automobile.

Alignment is the angle called camber, caster, toe, etc. for suspension parts, arm parts, and other parts that make up the suspension of an automobile.

If the alignment is not correct, the car may not run straight, the body may not be stable under braking, or the tires may wear unevenly, and it is necessary to adjust and maintain the proper value. An alignment tester is used to measure whether the alignment is correct or not.
