The global Alkaline Barium Dinonylnaphthalene Sulfonate market size is expected to reach \$ 33.35 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Alkaline barium dinonylnaphthalene sulfonate (commonly known as T705) is a high-performance, oil-soluble rust inhibitor additive that provides excellent rust protection for ferrous metals, while also offering lubrication and anti-wear properties. It forms a hydrophobic protective film that prevents corrosion. It is a surfactant containing both hydrophilic and lipophilic groups, allowing it to adsorb onto metal surfaces, forming a protective layer, and neutralize acidic substances in the oil.

The upstream core raw materials include dinonylnaphthalene, fuming sulfuric acid (or sulfur trioxide), and barium oxide (or barium hydroxide). Global sales are projected to be approximately 35,000 tons in 2025, with an average market price of approximately US\$660 per ton. The industry's gross profit margin is approximately 10-20%.
