Abstracts

APG is a new type of non-ionic surfactant with more comprehensive performance. It has the characteristics of common non-ionic and anionic surfactants. Usually, industrial products are made into 50% and 70% aqueous solutions. The shape is usually colorless to Light yellow viscous liquid or milky white cream (winter). Pure APG is brown or amber flake solid, easy to absorb moisture. APG is generally soluble in water and is easily soluble in common organic solvents. It exhibits excellent compatibility, stability and surface activity in acid and alkaline solutions, especially in active solvents with high inorganic components. APG can be completely biodegraded in nature and will not form metabolites that are difficult to biodegrade, thus avoiding new pollution to the environment.
