Alkyl polyglycosides (APGs) are a class of non-ionic surfactants widely used in a variety of household and industrial applications. They are derived from sugars and fatty alcohols; therefore, they are generally favored for their manufacture from renewable resources.

Scope of the Report:

This report focuses on the Alkyl Polyglucosides in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Europe dominated global alkyl polyglucosides market and the trend is anticipated to stay over the forecast period. Increasing ecofriendly, bio degradable products demand and rising consumer awareness regarding health hazards associated with inorganic surfactants is expected to be a key driving factor for alkyl polyglucosides demand and in turn alkyl polyglucosides market growth in Europe. North America is expected to witness significant alkyl polyglucosides market growth due to increasing conventional surfactants replacement with bio surfactants in the region.

The worldwide market for Alkyl Polyglucosides is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
