Anhydroxylitol was intended to deliver both quick and long-term hydration through the fermentation of wood and wheat. It is helpful in glycosaminoglycan production which is utilised to optimise the natural moisture conservation of the skin (GAGs, and chondroitin sulphate which help to retain skin moisture). It reduces loss of water by physiological evaporation while increasing the formation of ceramide barrier.

According to our (Global Info Research) latest study, the global Anhydroxylitol market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
