According to our (Global Info Research) latest study, the global All-in-one Laundry Capsule market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

In terms of region, North America is expected to remain the largest market for all-in-one laundry capsule during the forecast period. Asia Pacific is expected to be the fastest growing market during the forecast period owing to the presence of a large number of consumers and the increasing adoption of premium laundry products in countries such as China, India, and Japan. Overall, the all-in-one laundry capsule market is expected to continue to grow over the next few years, driven by rising demand for convenient and effective laundry products and rising awareness of environmental sustainability.

All-in-one laundry capsules, also known as laundry pods or laundry pacs, are a type of laundry detergent that combines multiple functions in a single pre-measured and pre-packaged unit. These capsules typically contain a combination of detergent, fabric softener, stain remover, and other additives, such as scent boosters or color protectors, all in one small and compact package. All-in-one laundry capsules are designed to be easy to use, eliminating the need to measure out detergent or other laundry products. The capsules are simply added to the washing machine drum with the laundry, and they dissolve during the wash cycle, releasing the detergent and other additives to clean and freshen the clothes.
