According to our (Global Info Research) latest study, the global All-Metal Locknuts market size was valued at US\$ 151 million in 2025 and is forecast to a readjusted size of US\$ 204 million by 2032 with a CAGR of 4.4% during review period.

All-metal locknuts are specialized fasteners that achieve vibration-resistant locking without the use of non-metallic inserts. They rely entirely on their metal construction through structural features such as deformation, eccentricity, slits, or wedge mechanisms to generate friction or mechanical interference in the thread engagement. These locknuts are highly durable, reusable, and resistant to heat and corrosion, making them suitable for demanding applications in aerospace, automotive, rail, and industrial machinery.
