Abstracts

The global All-Metal Locknuts market size is expected to reach \$ 204 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

All-metal locknuts are specialized fasteners that achieve vibration-resistant locking without the use of non-metallic inserts. They rely entirely on their metal construction through structural features such as deformation, eccentricity, slits, or wedge mechanisms to generate friction or mechanical interference in the thread engagement. These locknuts are highly durable, reusable, and resistant to heat and corrosion, making them suitable for demanding applications in aerospace, automotive, rail, and industrial machinery.

This report studies the global All-Metal Locknuts production, demand, key manufacturers, and key regions.
