## Abstracts

The development of offshore valves is the rise of the maritime trade, which has led to an increase in the size of merchant shipping fleets and an increase in the procurement of advanced ships by the global navy, which has driven the demand for marine actuators. Based on materials, the market for marine actuators and valves is divided into stainless steel, alloy based, aluminum, etc. Alloy base materials are expected to grow at the highest compound annual growth rate over the forecast period. Manufacturers are using these alloys for marine applications that are very versatile and have excellent corrosion resistance in the marine atmosphere and seawater. And being used for subsea actuators, propellers, pipes and heat exchanger pipes due to their corrosion resistance, durability and thermal conductivity, this will drive the demand for marine actuators and valves.
