According to our (Global Info Research) latest study, the global Alloy Resistors market size was valued at USD 803.4 million in 2022 and is forecast to a readjusted size of USD 1062.7 million by 2029 with a CAGR of 4.1% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Global key manufacturers of alloy resistors include YAGEO, UNI-ROYAL, WalterFuse, TA-I Technology, and Fenghua Advanced Technology, etc. The top two manufacturers occupy a total of 35% market share, with the largest manufacturer being YAGEO, accounting for 22%. The global production areas are mainly located in North America, Europe, Japan, China, Korea, Taiwan (China), and Southeast Asia. China is the largest alloy resistor producing region, with over 74% share. In terms of classification, 1xxx has the largest market share with 29%, followed by 2xxx. In terms of downstream industries, the automotive industry is the top application area with 23% market share; in addition, the batteries and components, and power industry are also important applications.

Alloy resistor is a kind of resistor using alloy as current medium, which generally has the characteristics of low resistance, high precision, low temperature coefficient, resistance to inrush current, high power, etc. Alloy resistors generally have low resistance values such as 1 milliohm, 10 milliohm, 100 milliohm, etc. due to the strong conductivity of the metal. It is used to feedback the changing current in the circuit in order to further control or influence the change of current. Mainly used in products such as: battery protection board, power supply class, inverter, lamps, motors, etc.
