## Abstracts

The global Allyl Glycidyl Ether market size is expected to reach \$ 81 million by 2029, rising at a market growth of 3.3% CAGR during the forecast period (2023-2029).

Allyl glycidyl ether is an organic compound used in adhesives and sealants and as a monomer for polymerization reactions. It is formally the condensation product of allyl alcohol and glycidol via an ether linkage. Because it contains both an alkene and an epoxide group, either group can be reacted selectively to yield a product where the other functional group remains intact for future reactions.

This report studies the global Allyl Glycidyl Ether production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Allyl Glycidyl Ether, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
