Almond Oil is an oil expressed from the nuts of almond tree. It is used as an emollient in skin creams and is also used to soften ear wax. The tree is native to SW Asia but is widely grown in warm regions for its nuts. Almond trees grow to an average height of 7 m; they have attractive pink flowers and are grown for ornament in cooler regions. The sweet almond oil, or *Prunus Amygdalus Dulcis* is pressed from the ripe seeds (nut) of the almond tree. It is a versatile, carrier oil, good for all skin types. Ground almonds make for excellent natural abrasives. Moist with Sweet Almond Oil, ground almonds help replenish the oils lost from the skin during the cleansing process; being rather soft in texture, they produce a gentle massaging effect in exfoliators. Almond Oil is very lubricating and can relieve itching and inflammation; a wonderful, natural moisturizer for 'dishpan' hands and chapped skin.

Almond Oil is rarely used as an edible oil. In the foodstuffs sector, it is only used in confectionery (macaroons). The main almond oil consumers are the cosmetics sector (cosmetic care products) and Medicine (aroma therapy, massage oil).
