## Abstracts

Alopecia is a term used to describe excessive hair damage under certain medical conditions or dietary issues.

Scope of the Report:

This report focuses on the Alopecia in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia Pacific is expected to grow at a lucrative CAGR of 5.3% over the coming eight years. The large population suffering from alopecia and the rising awareness levels pertaining to the available therapeutic options is one of the key factors for the region's high growth rate. The economic development coupled with the constantly rising disposable income in countries such as China, India, and Singapore will present high growth opportunities. The recent innovations and technological trends in alopecia treatment, the increasing healthcare expenditures, and the augmented healthcare facilities are expected to boost the alopecia treatment market.

The worldwide market for Alopecia is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
