Abstracts

The global Alumina Sol market size is expected to reach \$ 321 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Alumina sol is a colloidal solution of alumina colloidal particles dispersed in water. The appearance is milky white or slightly yellow granular or paste. Because the colloidal particles are fine, have a considerable specific surface area and chemical activity, it is easier to form new alumina composites with related components. It has a wide range of applications in various industrial fields. It can be used together with silica sol or used alone.

Global Alumina Sol key players include Nissan Chemical, Sasol Performance Chemicals, Zibo Jiarun, Hanzhou Zhihuajie, Kawaken Fine Chemicals, etc. Global top five manufacturers hold a share over 30%.

China is the largest market, with a share about 45%, followed by Japan, which have a share about 35 percent.

In terms of product, Above 100 nm is the largest segment, with a share over 65%. And in terms of application, the largest application is Catalysts, followed by Refractories.

This report studies the global Alumina Sol production, demand, key manufacturers, and key regions.
