The global Aluminium Extrusion Press market size is expected to reach $ 979 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

In 2025, global Aluminium Extrusion Press production reached approximately 300 units, with an average global market price of around 2.4 million dollars per unit. An Aluminium Extrusion Press is a heavy-duty metal-forming machine used to produce aluminum profiles, tubes, bars, rods, and hollow sections by forcing a heated aluminum billet through a shaped die under high pressure. The aluminum billet is usually preheated to a suitable extrusion temperature, placed inside a container, and pushed by a hydraulic ram through the die opening. As the aluminum flows through the die, it takes on the required cross-sectional shape.

The Aluminium Extrusion Press market is an integral part of the manufacturing industry, particularly in sectors that involve the production of metal and plastic products with uniform cross-sections. An Aluminium Extrusion Press market analysis examines various factors that influence the industry's growth, trends, challenges, and opportunities. The Aluminium Extrusion Press market size is influenced by the demand for extruded products across various industries, including construction, automotive, aerospace, and packaging. The market has been experiencing steady growth due to industrialization, urbanization, and infrastructure development, especially in emerging economies. Asia-Pacific is expected to account for the largest market share due to the presence of major manufacturing hubs in China, India, and Japan. North America is seeing steady growth due to the increasing demand for lightweight materials in the automotive industry and infrastructure projects.
