## Abstracts

The global Aluminium Recycling market size is expected to reach \$ 129650 million by 2029, rising at a market growth of 0.0% CAGR during the forecast period (2023-2029).

Global key players of aluminium recycling include Novelis, Norsk Hydro, UACJ, etc. The top three players hold a share about 21%. Asia Pacific is the largest market, has a share about 47%, followed by Americas and Europe, with share 25% and 21%, separately.

Aluminium recycling is the process by which scrap aluminium can be reused in products after its initial production. The process involves simply re-melting the metal, which is far less expensive and energy-intensive than creating new aluminium through the electrolysis of aluminium oxide (Al<sub>2</sub>O<sub>3</sub>), which must first be mined from bauxite ore and then refined using the Bayer process.

This report studies the global Aluminium Recycling production, demand, key manufacturers, and key regions.
