Abstracts

According to our (Global Info Research) latest study, the global Aluminum 6061 Profile market size was valued at US\$ 257 million in 2025 and is forecast to a readjusted size of US\$ 461 million by 2032 with a CAGR of 8.6% during review period.

Aluminum 6061 Profile is a precipitation-hardened Al-Mg-Si alloy extrusion product characterized by balanced strength, corrosion resistance, and good formability, widely used for structural framing, load-bearing supports, and precision-engineered components in industrial and transportation applications. In 2025, production was 86,206 tons and the average price was USD 2,900 per ton. The industry operated with a single-line capacity of about 500 tons and an average gross margin of 16%. Upstream, key inputs include electrolytic aluminum ingots, magnesium and silicon alloying elements, as well as casting, extrusion, and surface-treatment equipment, supplied by companies such as Alcoa, Rio Tinto, Chalco, and Yunnan Aluminum. The midstream segment involves alloy melting, homogenization, billet casting, extrusion forming, heat treatment, and finishing processes that determine dimensional accuracy, mechanical properties, and surface quality. Downstream demand is driven by construction, automotive, and marine sectors, with representative customers including Tesla, General Motors, SAIC Motor, and CSSC. Looking ahead, profitability in a highly competitive market depends on improving extrusion efficiency, optimizing alloy formulations, enhancing value-added surface treatments, and securing long-term contracts with high-end manufacturing customers.

Aluminum 6061 Profile is increasingly positioned as a versatile structural material across construction, transportation, and industrial equipment, driven by the need for lightweighting, corrosion resistance, and design flexibility. In the construction sector,

modular buildings and prefabricated systems are accelerating the adoption of standardized aluminum profiles due to their ease of assembly and lifecycle durability. In automotive and rail transit, the shift toward electrification and energy efficiency is pushing manufacturers to replace traditional steel components with aluminum extrusions to reduce weight and improve performance. Meanwhile, marine and offshore applications continue to favor 6061 profiles for their resistance to harsh environments. However, margin expansion remains constrained by raw material price volatility and homogenized competition in mid-range products. Companies that invest in precision extrusion, high-strength alloy development, and downstream fabrication capabilities are more likely to capture value from customized and high-specification applications, where pricing power and customer stickiness are relatively stronger.

This report is a detailed and comprehensive analysis for global Aluminum 6061 Profile market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Aluminum 6061 Profile market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Aluminum 6061 Profile market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Aluminum 6061 Profile market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Aluminum 6061 Profile market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/Ton), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Aluminum 6061 Profile

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Aluminum 6061 Profile market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Rio Tinto Group, Saudi Arabian Mining, Vedanta Aluminum, Norsk Hydro ASA, Rusal, Aluminum Corporation of China, Hindalco Industries, Alcoa Corporation, Shandong Nanshan Aluminium, Hitachi Metals, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Aluminum 6061 Profile market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Aluminum Tube

Aluminum Bar

Aluminum Plate

Others

Market segment by Thickness

Thickness

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Aluminum 6061 Profile Consumption Value by Type: 2021
Versus 2025 Versus 2032

1.3.2 Aluminum Tube

1.3.3 Aluminum Bar

1.3.4 Aluminum Plate

1.3.5 Others

1.4 Market Analysis by Thickness

1.4.1 Overview: Global Aluminum 6061 Profile Consumption Value by Thickness: 2021
Versus 2025 Versus 2032

1.4.2 Thickness
