According to our (Global Info Research) latest study, the global Aluminum Base PCBs market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Aluminum based pcb circuit board is the most widely used circuit board in the pcb board industry, and it is also the cheapest metal circuit board with good thermal conductivity. Aluminum-based pcb circuit board is the most cost-effective circuit board among many boards with heat dissipation performance. The aluminum-based pcb circuit board is divided into three layers, the upper layer is the wiring layer, the middle layer is the heat conduction and insulation layer, and the lower layer is the metal aluminum base layer, which has the function of heat dissipation.

According to our Semiconductor Research Center, the global total output value of PCB was about US\$ 81 billion in 2022. With strong drivers from new technology, such as AI, 5G and new energy vehicles, it is estimated that the PCB industry will continue to grow steadily in the next six years. Global PCB manufacturers are mainly located in China mainland, China Taiwan, Japan, South Korea, Europe and the United States. Among them, Chinese local PCB companies hold the biggest share.
