The EDM (Electric Discharge Machines) is one of the non-conventional machine used to manufacture complex metals parts. It is significantly used in aerospace and automotive industry where complexity of the parts is higher. For the EDM machines to work the need of electro erosion fluids also called as spark fluids are required. These fluids acts as dielectric between the workpiece and the electrode. Also, it acts as flushing agent in washing the debris produced during the manufacturing process.

According to our (Global Info Research) latest study, the global Electro-Erosion Fluid market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.
